DETAILED ACTION

1. Applicant's response filed 06/08/2005 has been considered with the following results.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4,9-10 and 12-16, drawn to an optical pickup/apparatus, classified in class 369, subclass 44.14.
 - II. Claim 11, drawn to a method of using/moving a blade, classified in class 369, subclass 44.32.
 - III. Claims 5-8, drawn to a method of making/assembling a pickup, classified in class 445, subclass 66.
1. The inventions are distinct, each from the other because of the following reasons:

II

Inventions III and ~~A~~ are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions III and II, are unrelated in that invention III is a method of making, including an

Art Unit: 2655

assembling a pickup having clearly distinct function from method of using a blade of invention

II.

Inventions I and III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). IN the instant case the process as claimed can be used to make other and materially different product, such as the optical pickup of the Applicant's admitted prior art.

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In the instant case, the process as claimed can be practiced by another materially different apparatus or by hand, such as an optical pickup which moves a blade in a focusing direction for compensating a deflection error and/or the apparatus as claimed can be used to practice another and materially different process, such as applying an electromagnetic force acting on a blade. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

2. If Group I is elected, restriction to one of the following inventions is required under 35 U.S.C. 121:

The claims are directed to the following patentably distinct species of the claimed invention:

- a. Fig. 6.
- b. Fig. 8.

3. If Group III is elected; the claims are directed to the following patentably distinct species of the claimed invention:

- c. Figs. 7A-7B.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, this application contains claims drawn to a plurality of species with no generic claims.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after

Art Unit: 2655

the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
